

Log Note -- 27 Jan 81

Mr. Bergman called from Scott AFB to ask our reason for having some declassified NIS sections marked "For Official Use Only." I explained our copyright concerns and asked if this caused him a problem in handling. He said that depended upon how we interpreted "Official Use." He has several contractors who need access to some of the Weather and Climate sections, among them Mitre Corporation and General Dynamics, both of whom are on the Defense Technical Information Center (DTIC) approved list. I replied that if the contractors required access in discharging their contractual responsibilities to the Government, I would consider that "Official Use." Mr. Bergman said that solved his problem and that he would stamp the sections with a stamp his library uses to ward off copyrighted content.
